ABOUT ME

*Alright peeps, I'm gonna keep this bio like me, short and pointless. It's probably just like every other biography out there, but oh well. You're gonna read it anyway, I assume.
 I am 25 years old male and born in Pekanbaru on June 28. Most the time I'm a pretty friendly person although I tend to be quite nervous and shy at times.
 I'm not care enough about school. I just always wanted to easy way out and didn't want to bother with school ritual. I like sit back on chair and listening to the teacher, doing home work or anything. Some people say I just don't have my priorities straight but if you look at it, most of the time in internet when I am online im learning everything especially about computer related things. I love Computer. Sure some may think I don't have priorities, but lets look at the facts. I am not you and our way is different. So yes I think I spent my time on what I think more important and think sometimes I can do what some other people cant do.

I'm a portuguese illustrator highly motivated and passionate about art in general. I have a fine art background that took me into illustration, which later on, with the use of technology also took me to work with Digital Illustration. Later on I decided to join the University doing a (BA) in Sound & Image, working side by side with artists from different areas. I also have as interests books, art & fashion magazines and Photography.

Currently I am living in Central London and looking forward to start working with people that share my love for Illustration & Video.

MILAN CHUDOBA

Freelance Graphic Designer

I've been a graphic designer for 6 years. I was 20 when I fell in love with graphic design and this relationship still continues. My first design was a website for friend of mine, I was very satisfied with it and thought how brilliant and modern it was. When I look at it now, I can't believe that my hands made something like this. I've completely changed my style, now I try to make modern, creative, simple and timeless designs.

To me visual communication—in architecture & graphic design—has often been about the challenge of paradoxes; aesthetics vs. functionality or minimalism vs. chaos, and still visual communication is as well as playing the cello! the most transcendental thing I've stumbled upon in life. It's a constant excuse to stay curious, learn something new and to interact with and observe society, media and people in general. And somewhere in between that I focus on the details, the process and keeping it simple.

ABOUT

With foundation in studies at the School of Architecture, I navigate in visual communication with an academic approach to research and use of method. To be able to design unique solutions that are tailored to product or customer I think it's important to go in depth with the values, history and analysis to find the right approach and solution. In the execution phase I value quality and simplicity high. I appreciate the facility in the printed media and I'm encouraged by the innovation and creativity of the digital world.

I am passionate about my profession and I feel comfortable in a dynamic and constantly changing environment in which shifting perceptions are possible. I enjoy life, and I feel privileged to work with aesthetics and communication every day.
